Cattle Research & Development Centre (CRDC) is one of the important centre under the management of Rural Development Academy (RDA), Bogra to deal with research, action research, training and advisory services special emphasis put on livestock and rural development in Bangladesh. The main task of the centre is to provide demand led livestock services and sustainable technologies for increasing their productivity and improving farmer's quality through improving scientific managerial and professional competency in harmony with environment. The centre is dedicated in sharing Knowledge and skills related to animal feeding, breeding, care, nutrition, management and treatment.

## VISION

Contribute in fullfilling the national demand on milk and meat.

## MISSION

To generate and disseminate demand driven, knowledge and technology based livestock services.

This centre also keenly seeks collaborations and partnerships with highly regarded organizations and educational institutions all over the world.

## OBJECTIVES

Objectives of CRDC are to

- produce and supply good quality semen for increasing milk and meat production through breed improvement
- enhance farmer's participatory system for proven bull production
- strengthen research-extension-farmers linkages, mobilize and build public private partnership (PPP)
- produce & supply good quality feeds & fodder with introducing unconventional feed for livestock
- ICT based livestock services with data management

## MANDATE OF CRDC
